

Temporary Services Providers

Staffing experts say that in the U.S., there are about 6,000 firms that have been in business a year or more, operating approximately 20,000 offices. The staffing industry generated approximately \$91 billion in sales in 2007; \$73.5 billion from temporary and contract staffing and \$17.5 billion in search and permanent placement services. Each day, nearly 3 million people are employed by staffing companies, and, in 2007, 11.4 million temporary and contract employees were hired by U.S. staffing firms.

ACCEL FINANCIAL STAFFING

Founded in 1995, Accel is a local company specializing in accounting and financial placement. And each of Accel's eight employees believes in community involvement.

"We have a combined staff experience of over 70 years, and we strongly believe in a team environment where we are all working for the same goals," said Meg Salyer, president. "We have great longevity. We have great relationships internally, and that means we have great relationships externally."

In such a competitive industry, with more than 100 staffing

companies and consultants just in the Oklahoma City metro area, Salyer says it is important to know the client, not just what they do professionally, but their corporate personality, as well.

As for why *OKBusiness* readers voted Accel Financial Staffing No. 1 in the Best of Business Temporary Services Provider category, Salyer said, "Perhaps it's because of the personal experience they had while working with us."

Congratulations, Accel Financial Staffing, on a job well done!
